Re : Newly commissioned Pea and Pulse Splitting Mill.

To whom it may concern.

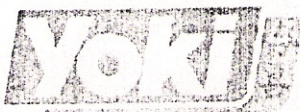

This is to confirm that we have installed and commissioned a Pea and Pulse Splitting Mill from S.K Engineering & Allied Works. We are most satisfied with the quality of the products that this mill produces and the manner in which their staff installed the Mill under guidance by Mr Vikas Matanhelia.

Yours Sincerely

Tim Cadzow

Installation and Comissioning Report

The Pea Splitting Plant purchased from S K Engineering and Allied Works has attended our needs and expectancy in regards to

- The productive of the installed plant was at an average of 85 % which means that for each 2 tons of raw material we were able to get 1.7 tons of finish product
- The finish product is in our technical specifications;
- The plant is working very well, the whole process is very well designed and the machinery itself is very well built;
- The date of delivery and the date of intallation settled between the parts were accomplished.
- The technical personnel - Mr. Vikas Matanhelia, Mr. Mohammad Idris and Mr. Jagdish Prasad - involved in the installation and comissioning of the plant were very well prepared and capable to do the work.

As a conclusion, Yoki Alimentos S.A. is very satisfied with the equipment, the finish product and the technical personnel involved in the installation and comissioning of the plant

MEMORANDUM

Corporate Engineering Division

DATE: March 24, 1999

TO: Vikas Matanhelia SK fax 011-91-5252-32904

C: Sheldon Windjack CSP fax 978-3473

FROM: E. R. Miller

SUBJECT: Pulse Splitting Plant – Installation Supervision

The installation of the above plant was completed and the plant is now operational.

Co-ordination of equipment installation was handled satisfactorily under the direction of Mr. Vikas Matanhelia.

His interaction with the general contractor on site and the engineer in charge was a key component in making this facility a success.

FROM: Sheldon Windjack

Subject: Lentil Problem

I am pleased to advise that the successful splitting of the red lentil without being dried has been accomplished successfully. The operational efficiency of the plant seems to be satisfactory given the limited tonnage that we were able to run through the plant do to time constraints on our part. Nevertheless I am very confident that our problem has been solved, so please take this letter as our satisfaction of work performed.

I am also very pleased with the support that SK. Engineering has given us, and especially commend Vikas and Jagdish for there guideinss in solving this problem for us, their hands on support was of the highest quality. CSP FOODS looks forward to continued mutual co-operation in the future.

Best Regards:
